

The Grove School of Engineering

Department of Chemical Engineering

Application forms are available at:

<http://www1.ccny.cuny.edu/prospective/admissions/applications.cfm>

CCNY Chemical Engineering

This is the place to start! Find exciting research opportunities by visiting CCNY ChE at

www1.ccny.cuny.edu/prospective/engineering/departments/chemical

A link to descriptions of faculty research and their homepages is found here.

Several faculty members in ChE are members of the Benjamin Levich Institute, a leading center in soft material, fluid and mixture dynamics, and rheology: www-levich.engr.ccny.cuny.edu

Special opportunities in soft materials are found through the *IGERT Program in Soft Materials* (softmaterials-igert.org) a joint program with Columbia University, and through the NSF CREST *Center for Mesoscale Modeling and Simulation* (www.ccny.cuny.edu/cmms).

The City College of New York: CCNY and CUNY

Our homepage is at www1.ccny.cuny.edu/.

The City College of New York (CCNY) is the flagship campus in the The City University of New York (CUNY) system, a university of 16 member campuses in the five boroughs of New York – Manhattan, Bronx, Brooklyn, Queens and Staten Island.

CCNY is located on a beautiful campus adjacent to a city park in upper Manhattan. Directions and maps are found at www1.ccny.cuny.edu/prospective/about/directions.cfm/. The College was founded in 1847 and moved to its present location in 1907.

The Grove School of Engineering at City College

Named in honor of alumnus Dr. Andy Grove (CCNY ChE 1960), founder and former CEO of Intel:

www1.ccny.cuny.edu/prospective/engineering/

On this page a video describing the Grove School is found.

New York City

Said to be the capital of the world, New York is our home. We'd love to introduce you personally, but to give you a chance to look around before you come see us, here are some places to start.

The official NYC site is www.nyc.gov/. Getting around NYC is best done on the remarkable subway system: www.mta.info/nyct/. Cultural events abound: an extensive list of museums is at www.ny.com/museums/all.museums.html; libraries include the renowned New York Public Library at www.nypl.org. Information on entertainment is almost unlimited: consider The Metropolitan Opera (www.metopera.org) and American Ballet Theater, both at Lincoln Center (www.lincolncenter.org); modern dance is found at www.ny.com/dance; Broadway and off-Broadway musicals (www.newyorkcitytheatre.com) and theater (www.nytheatre.com) as well as a wide range of popular and arts cinemas (see Time Out New York www.timeout.com/newyork or the Village Voice www.villagevoice.com/film) provide a spectrum of things to do. For sports fans, there are nine professional teams and many universities competing in the metropolitan New York area, at sites from Madison Square Garden to Yankee Stadium, to the National Tennis Center, to Belmont Park—a quick link to all of these is found at www.nyc.gov/html/sports/html/venues.html/. Have fun!

Lest we forget, you might get hungry! Check out the diverse restaurant scene at nymag.com/restaurants and www.menupages.com.
